

Product Information

PRO BLEACH

Pro Bleach is a 4% liquid chlorine bleach. Pro Bleach is suitable for many applications such as cleaning deodorising, whitening and disinfecting.

Pro Bleach should be stored in a cool dark place. Accidental splashes of Pro Bleach should be washed off immediately with water. For splashes in the eyes, irrigate with copious supplies of water.

Pro Bleach with a recommendation of dilution rate and method of use.

1. **BLEACHING** of sound white clothes.

Dilution: 15 mls/10 litres

Method: (a) Cold - Immerse washed clothes in Pro Bleach solution and soak for 3 hours, then rinse.

(b) Hot – Add the Pro Bleach to the hot wash water before charging the clothes and wash with the normal machine cycle using Pro Wash Concentrated powder.

2. **STAIN REMOVAL** - such as tea, coffee, fruit, wine, blood and ink - from sound white cotton and linen.

Dilution: 15 mls/litre

Method: Soak stained portion in Pro Bleach solution for 5 to 15 minutes, then rinse thoroughly.

3. **CLEANING AND DISINFECTING** - tables, cooking boards, whiteboard of every description, linoleum, boarded, tiled and stone floors and steps.

Dilution: 8 mls/litre

Method: Wash down with Pro Bleach solution, leave for a few minutes before rinsing.

4. **GREASY SINKS, BATHS, ETC.**

Dilution: 8 mls/litre Method: Wash all over with Pro Bleach solution, soak for 20 minutes, scrub and rinse.

5. **LAVATORY PANS, Disinfecting.**

Dilution: 150 mls neat Method: Pour over the sides of the bowl last thing at night, allow to stand, then swab and flush in the morning. May be used in septic tank systems.

6. DISINFECTING OF REFUSE TIPS, DRAINS, GULLIES, URINALS.

Dilution: 8 mls/litre Method: Spray or flush with Pro Bleach solution.

7. REMOVING SLIME from concrete surfaces and mosses and moulds from roofing materials.

Dilution: 15 mls/litre Method: Apply Pro Bleach solution and leave to soak, then use stiff brush and hose or swill with water.

8. SMALL SWIMMING POOLS

Disinfecting Dilution: 2.5 mls/100 litres Method: Dilute in water-can of water and spray over pool surface each evening. Mix thoroughly and leave overnight before using pool. If water is circulated and filtered, drip feed the Pro Bleach into the suction side of the pump.

9. EGG WASHING - to clean and sanitise eggs

Dilution: 1.5mls/litre which equates to 200ppm of available chlorine.

Dilutions Table

8.0 mls/litre	=	approx.	1000 ppm chlorine
6.5 mls/litre	=	approx.	800 ppm chlorine
2.5 mls/litre	=	approx.	300 ppm chlorine
1.5 mls/litre	=	approx.	200 ppm chlorine
0.1 mls/litre	=	approx.	10 ppm chlorine

Always use Pro Bleach at the dilutions recommended.

1. When making up solutions, always add the Pro Bleach to the water and stir.
2. All utensils used for mixing Pro Bleach should be rinsed with clean water immediately after use. Never allow undiluted Pro Bleach to meet metal.
3. Pro Bleach **IS A STRONG BLEACHING AGENT** and its solutions should not be used on woollens, nylon, coloured goods, drip-dry fabrics, stained or varnished surfaces.
